PRANITHA P (Team Lead)	7376242IT255	Backend Development, AI Integration, API Development
NETHRA B (Member)	7376242IT230	Frontend Development, UI/UX Design, Testing & Deployment

Project Overview:

The AI-Powered Fact Verification Agent is a web-based application that verifies textual factual claims using Artificial Intelligence. It retrieves relevant evidence through the Tavily Search API and uses the Llama 3.x model via the Groq API to analyze the evidence and generate an explainable verification report containing the verdict, confidence score, supporting evidence, and references.
